

Comac cleaning machines in the healthcare

The environments common to the health sector are all very different, but are distinguished by a single common denominator: the need to maintain **high standards of cleaning, hygiene and sanitization**. As these are places where sick people might reside for quite long periods, it is easy to understand how much, in this sector, cleaning is not a mere matter of appearance. Indeed, it is rather an **essential tool to guarantee the well-being of patients, of their relatives and of health workers**. For this reason, in the health sector, **cleaning and sanitization operations** are activities that must be performed at the highest level and as such should employ **professional equipment** as well as trained and competent staff. Indeed, in the health sector it is essential to ensure maximum cleaning and sanitization so as to contribute to the **reduction of environmental contamination** and **in consequence decrease the risk of infections** related to healthcare assistance.

comac
professional people

Cleaning and Sanitization: Comac's offering for the health sector.

Cleaning operations in the health sector are characterized by categorizing environments according to how the various areas that need cleaning are classified. This requirement is due to the fact that each area needs different cleaning solutions, related to the specific needs of each environment. Considering this, Comac has developed professional cleaning machines that are particularly suitable for the health sector, offering a range of products and technologies aimed at meeting the real needs of healthcare structures.

Within the wide range of professional floor cleaning machines designed by Comac, some are especially suitable to the environments common to the health sector, such as:

- Hospitals
- Nursing homes
- Rest homes
- Private clinics
- Medical centers
- Dentists' surgeries
- Vets' surgeries
- Laboratories
- Health centers

Igea

Solution tank capacity: **1,2 l**

Recommended for spaces up to: **300 m²**

Battery run time up to: **1 h**

Igea is Comac's most compact floor scrubber, designed to replace manual cleaning systems like mops and buckets. Igea is a micro floor scrubber suitable for maintenance cleaning of surfaces up to 300 sq.m. Its extremely compact dimensions make it perfect for working in small or highly cluttered spaces like offices, shops, bars and small businesses, guaranteeing professional mechanized cleaning also in these environments.

Vispa XS

Solution tank capacity: **3 l**

Recommended for spaces up to: **800 m²**

Battery run time up to: **1 h (Eco)**

Vispa XS is the revolutionary floor scrubber with lithium battery that offers professional results in small, congested spaces, making cleaning professional on demand. Thanks to its compact dimensions, it's the perfect solution for cleaning floors in fast food outlets, restaurants, bars, shops, small businesses and offices. Vispa XS is suitable for all maintenance cleaning activities in small and cluttered places, up to 800 sq.m.

Vispa 35

Solution tank capacity: **8-10 l**

Recommended for spaces up to: **1000 m²**

Battery run time up to: **1 h**

Vispa 35 is the floor scrubber that has revolutionized cleaning operations in small and congested areas because it's perfect to replace manual cleaning systems. Floors are scrubbed, dried and hygienized in a single passage, so that they're immediately safe to walk on. Designed for cleaning small shops, offices, canteens, restaurants, wellness centers, hair salons, doctors surgeries and nursery and other schools, Vispa 35 offers all the advantages of a professional scrubbing machine, with the practicality and compactness that have always distinguished it. Vispa 35 is suitable for maintenance cleaning of floors up to 1000 sq.m. It is available in battery-powered and cable-powered scrubbing version and battery-powered sweeping version.

Vispa EVO

Solution tank capacity: **15 l**

Recommended for spaces up to: **1300 m²**

Battery run time up to: **2 h (Eco)**

Professional floor scrubber Vispa EVO is the compact, powerful professional scrubbing machine that's up to tackling the most stubborn dirt. It's ideal for the maintenance cleaning of small and medium-sized areas, even when cluttered. It's the evolution of the compact Comac scrubbing machines, as it offers the many well-known characteristics of walk-behinds, combining agility, power, reliability and technological innovation in a unique example of pure user pleasure. Vispa EVO is the professional floor scrubber suitable for maintenance cleaning of floors up to 1300 sq.m. and is available in a battery-powered scrubbing version.

Vispa XL

Solution tank capacity: **25 l**

Recommended for spaces up to: **1600 m²**

Battery run time up to: **3 h (Eco)**

Vispa XL is a powerful, cutting-edge floor scrubber, but is also extremely easy to use and maneuverable. With a 43 cm working width and an exclusive design, it fits perfectly into the existing range, becoming a new ally in maintenance cleaning operations in small and medium-sized spaces, including those that are cluttered, and tackling even the most stubborn dirt. Despite its small size, the machine is equipped with the same technology as the larger models, enabling you to complete your fleet with a compact, high-performance solution. Robust and reliable, Vispa XL is also practical and easy to use so suitable for cleaning floors in the HoReCa, cleaning contractors, retail, well-being and sports sectors and all restricted areas that require power and excellent performance. Vispa XL is suitable for maintenance cleaning of floors up to 1600 sq.m. and is available in a battery-powered scrubbing version.

Abila

Solution tank capacity: **33 l**

Recommended for spaces up to: **1600 m²**

Battery run time up to: **2,5 h**

Abila is a very practical and compact walk-behind floor scrubber, so ideal for cleaning cluttered areas. Designed as an effective, efficient and comfortable solution to achieve professional floor cleaning but with limited costs of ownership. Abila is the perfect choice for easy but reliable cleaning in medium-sized areas, including cluttered spaces in environments such as retail outlets, garages, gyms or healthcare environments in general. Designed to ensure the greatest user-friendliness in daily cleaning operations, Abila is suitable for maintenance cleaning on floors up to 1600 sq.m.

L20

Solution tank capacity: **40 l**

Recommended for spaces up to: **1800 m²**

Battery run time up to: **3 h**

L20 is the easy but reliable walk-behind floor scrubber that allows increased productivity and reduced cleaning costs. Characterized by compact dimensions, it's the ideal model to achieve professional cleaning results and reduced costs of ownership in supermarkets, commercial areas in general, schools, gyms, warehouses, workshops and garages. Designed to ensure the greatest reliability and user-friendliness in daily operations, L20 is suitable for maintenance cleaning on floors up to 1800 sq.m.

Antea

Solution tank capacity: **40 l**

Recommended for spaces up to: **2200 m²**

Battery run time up to: **4 h**

Antea is a high performing, easy to use, walk-behind professional scrubbing machine. Ideal for the professional cleaning of floors in offices, hospitals, shops, public buildings, restaurants, hotels, sports centers, supermarkets and production facilities. Robust, resistant and reliable, the professional floor scrubber Antea was designed to improve productivity and reduce the cost of cleaning operations. Antea's technical characteristics and functions make it a professional floor scrubber suitable for both maintenance and heavy duty cleaning of floors up to 2200 sq.m.

Versa

Solution tank capacity: **62 l**

Recommended for spaces up to: **3200 m²**

Battery run time up to: **3 h**

Versa is a powerful, high-performance, walk-behind scrubbing machine designed to be easy to use as well. Reliable and efficient, it's the ideal solution for increasing productivity and reducing the cost of cleaning operations. Equipped with the power needed to work even in difficult situations, Versa allows excellent cleaning results in environments like supermarkets, public buildings, hospitals, warehouses, car showrooms, workshops and production facilities. Its technical characteristics and functions make it a professional scrubber dryer suitable for maintenance and heavy duty cleaning of floors up to 3200 sq.m.

Vega

Solution tank capacity: **75 l**

Recommended for spaces up to: **4500 m²**

Battery run time up to: **3,5 h**

Vega is a walk-behind floor scrubber that combines power and versatility in a single machine while remaining compact and easy to handle. Comac quality focuses on essentials with Vega: ease of use, robustness and functional design make the range perfect for work even in the most difficult and dirty conditions. That makes it a scrubber dryer suitable for any situation: from cleaning floors in the industrial or logistics sectors to healthcare facilities or large-scale retailing. Vega's technical characteristics and functions make it a professional floor scrubber suitable for both maintenance and heavy duty cleaning of large floors, up to 4500 sq.m.

Innova 55

Solution tank capacity: **65 l**

Recommended for spaces up to: **4500 m²**

Battery run time up to: **3 h**

Innova 55 is the ride-on scrubbing machine that multiplies productivity and halves times compared to walk-behind scrubbing machines. Comac has designed this model to be extremely convenient: for the same cost as a walk-behind, Innova 55 is more comfortable and faster. Its ultra-compact dimensions give this scrubber dryer the necessary maneuverability to perform in small spaces, going very easily around obstacles to complete cleaning operations quickly, with considerable savings on cleaning costs. That's why Innova 55 is the best solution for cleaning floors in hospitals, nursing homes, schools, sports centers, supermarkets and offices. Its technical characteristics and functions make it a professional scrubbing machine suitable for maintenance cleaning of floors up to 4500 sq.m.

Innova

Solution tank capacity: **110 l**

Recommended for spaces up to: **6000 m²**

Battery run time up to: **3,5 h**

The Innova family is a range of extremely versatile and easy to use ride-on floor scrubbers. The compact dimensions and maneuverability of these scrubbing machines allow them to be used even in congested areas. Innova has always been a family of well-known scrubbing machines appreciated for their reliability and performance in floor scrubbing and drying. The automatic versions of Innova come as standard with the Eco Mode device, which guarantees a low noise level, making them ideal for daily use even in sensitive areas. All these characteristics make them particularly suitable for working in environments like supermarkets, shopping centers, hospitals, nursing homes, airports and stations, but also inside industrial production sites and warehouses. Innova floor scrubbers are suitable for maintenance cleaning of floors up to 6,000 sq.m.

Innova Comfort

Solution tank capacity: **120 l**

Recommended for spaces up to: **6000 m²**

Battery run time up to: **3 h**

Ride-on floor scrubber Innova Comfort is a ride-on floor scrubber that is both extremely comfortable and easy to use. The capacity of the tanks and the technical features of the Innova Comfort make it an excellent partner for maintenance cleaning; it is fast and effective, and can guarantee the utmost discretion during cleaning operations, thanks to the devices for noise reduction that are fitted as standard. In consideration of the current scenario, and as part of its ongoing attention to the environment, Comac has given the Innova Comfort innovative technologies directed towards saving resources, reducing waste and limiting consumption. Innova Comfort falls into the category of ride-on scrubbing machines and is therefore suitable for working in areas characterized by the passage of a high number of people such as the public sector, educational establishments, swimming pools, gyms and supermarkets, and all situations that require professional cleaning of floors up to 6000 sq.m.

Optima

Solution tank capacity: **160 l**

Recommended for spaces up to: **10000 m²**

Battery run time up to: **3 h**

Optima is a ride-on floor scrubber with a robust design, suitable for working in different environments, both commercial and industrial, ensuring excellent performance, even for the deep cleaning of various hard floors such as warehouses, logistics centers or finer surfaces such as in shopping centers and supermarkets. Comfort and complete control over the machine ensured by the operator position and easy controls, enhance the results during the operations. The big tanks capacity increases working autonomy while quiet operations allow to perform also in daytime without disturbing the people around: such features guarantee great efficiency and productivity. Great performance: perfectly clean surfaces even in heavy duty cleaning on floors up to 10000 sq.m.

InAqua

InAqua

Type of system: **external**

Type of filtration: **chemical/physical**

InAqua is an external purification system that can filter and clean the dirty water used for scrubbing floors. InAqua means that the dirty water from normal floor cleaning operations can be cleaned and reused. InAqua is very easy to use, also called "water washing machine" because it operates in a very similar way to a domestic washing machine. InAqua can clean up to 150 liters of water in just 30 minutes. This system allows dirty water to be loaded directly from any floor scrubber. InAqua can aggregate and divide dirt, thus supplying clean water at the outlet and depositing dirt in special bag filters. InAqua makes it possible to reuse scrubbing water from any scrubbing machine and, if necessary, also waste water from manual cleaning systems. This means that Comac can offer a solution capable of reducing the use of water, saving money and making cleaning operations more environmentally friendly.

CS50

CS500

CS60

CS700/800

CS50

Debris hopper capacity: **40 l**

Working width of the central brush: **500 mm**

Filling system: **rear**

Walk-behind sweeper CS50 is the little walk-behind sweeper that's extremely compact and easy to handle. Great performance and user-friendliness are the main characteristics of this sweeper that allows cleaning operations to be sped up considerably, also simplifying the job for the operator. Suitable for cleaning both inside and outside floors measuring up to 2500 sq.m., Comac CS50 is the ideal solution for sweeping paths, garages, car parks or warehouses in the logistics, public, health, handicraft or automotive sector. The CS50 walk-behind sweeper is available in a version with Honda gasoline engine (CS50 H/HT).

CS500

Debris hopper capacity: **50 l**

Working width of the central brush: **500 mm**

Filling system: **rear**

CS500 is a small walk-behind sweeping machine; it is practical and compact yet powerful and precise when cleaning surfaces. This small battery-powered sweeper simplifies cleaning operations, courtesy of its excellent performance levels which enable the productivity of those who use it to be increased. Suitable for cleaning both indoor and outdoor surfaces measuring up to 2600 sq.m, Comac CS500 is the perfect sweeping machine for sweeping garages, car parks, paths, walkways or pavements. However, this small sweeping machine is also ideal for cleaning warehouses, motorway service areas, car washes and spaces dedicated to the logistics, public, artisan production or automotive sectors. The CS500 battery-powered sweeping machine is available in versions with or without traction, and can also be equipped with lithium batteries.

CS60

Debris hopper capacity: **65 l**

Working width of the central brush: **600 mm**

Filling system: **rear**

Ride-on sweeper CS60 is a ride-on sweeper that's extremely compact and versatile, designed to meet different cleaning needs. It's a sweeper able to offer great productivity while staying eco-friendly and reducing consumption, thanks to the Hybrid version. CS60 is available in two versions: battery-powered CS60 B, suitable for cleaning floors up to 8000 sq.m., and CS60 Hybrid powered by a combination of gasoline engine with battery to double the working autonomy and cover up to 15000 sq.m. Characterized by limited dimensions and great maneuverability, Comac CS60 is particularly suitable for the outside and inside floors of industrial environments, warehouses and car parks and in the HoReCa, public, logistics and handicraft sectors.

CS700/800

Debris hopper capacity: **60-70 l**

Working width of the central brush: **700-800 mm**

Filling system: **rear**

CS700 and CS800 is a range of industrial ride-on sweepers devised to offer maximum user-friendliness and great comfort for the operator. Extremely robust and reliable, CS700 and CS800 floor sweepers were designed to offer great productivity and effective, affordable cleaning. CS700 and CS800 floor sweepers are available battery-powered or with gasoline engine, and with two different working widths to meet all cleaning requirements. Extremely effective also in the presence of coarse dirt, these sweepers are suitable for cleaning indoor and outdoor floors and surfaces in industrial environments, warehouses, shopping areas, car parks and in the public, automotive and transport sectors and areas measuring up to 15,000 sq.m.

CA Dry

CA W/D 1 Motor

CA W/D 2 Motors

CA W/D 3 Motors

CA X-Vactor

Carpet

CA Dry

Capacity of the tank from/to: **13/15 l**

Type: **professional DRY**

Vacuuming: **1 motor**

Our CA Dry range is made up of powerful and compact professional vacuum cleaners that can be found in three versions: CA15 EASY, CA POD EXTRA and CA POD SILENZIO. These vacuum cleaners are easy to use, but they always guarantee the highest standards of cleanliness. Designed for daily cleaning, even in hard-to-reach areas, the vacuum cleaners in the CA Dry range offer energy efficiency and high performance. They are also reliable and, thanks to the reduced noise levels, they can work in any conditions. These professional vacuum cleaners are the ideal choice for cleaning contractors and for environments in the healthcare, public, Ho.Re.Ca., retail as well as Well-being and Sports sectors.

CA W/D 1 Motor

Capacity of the tank from/to: **30/80 l**

Type: **professional WET & DRY**

Vacuuming: **1 motor**

The professional wet & dry vacuum cleaners in the CA Wet&Dry range with single motor have been designed to offer practicality and professional results. These vacuum cleaners are equipped with a very spacious tank, but one designed to be practical and user-friendly. They are tough and easy to handle, and are used to clean medium surfaces or suck up solid material of various dimensions. The versatility and performance of these professional vacuum cleaners makes them suitable for cleaning contractors, demanding applications and rental in public environments, in the HoReCa, Well-being & Sports sectors.

CA W/D 2 Motors

Capacity of the tank from/to: **77/110 l**

Type: **professional WET & DRY**

Vacuuming: **2 motors**

The professional wet & dry vacuum cleaners in the CA Wet&Dry range with dual motor have been designed to offer practicality and professional results. These vacuum cleaners are equipped with a very spacious tank, but one designed to be practical and user-friendly. They are tough and easy to handle, and are used to clean medium surfaces or suck up solid material of various dimensions. The versatility and performance of these professional vacuum cleaners makes them suitable for cleaning contractors, demanding applications and rental in public environments, in the HoReCa, Well-being & Sports sectors. Models with dual motor are the ideal solution for vacuuming dust and liquids in the transport, logistics and large-scale retailing sector.

CA W/D 3 Motors

Capacity of the tank from/to: **65 l**

Type: **professional WET & DRY**

Vacuuming: **3 motors**

The professional wet & dry vacuum cleaners in the CA Wet&Dry range with triple motor have been designed to offer practicality and professional results. These vacuum cleaners are equipped with a very spacious tank, but one designed to be practical and user-friendly. They are tough and easy to handle, and are used to clean medium surfaces or suck up solid material of various dimensions. The versatility and performance of these professional vacuum cleaners makes them suitable for cleaning contractors, demanding applications and rental in public environments, in the HoReCa, Well-being & Sports sectors. Models with triple motor are the ideal solution for vacuuming dust and liquids in the transport, logistics and large-scale retailing sector.

CA X-Vactor

Capacity of the tank from/to: **single bag**

Type: **industrial**

Vacuuming: **motors**

CA X-Vactor is a range of industrial vacuum cleaners suitable for intensive dust management. These vacuum cleaners have been designed to remove lots of dust quickly and efficiently. All aspects of form and function in the CA X-Vactor range have been designed to provide effective and reliable dust vacuum so as to maximize efficiency and minimize downtime. These vacuum cleaners are essential for keeping work sites and environments safe, clean and free of dangerous dust. The vacuum cleaners in the CA X-Vactor range are perfect for work sites and use in combination with machines for floor treatment in the industrial, health, handicraft and automotive sectors, as well as transport and logistics.

Carpet

Capacity of the tank from/to: **20 l**

Type: **carpet**

Vacuuming: **1 motor**

Carpet by Comac is the ideal equipment for deep cleaning and removing stains and dirt on fabric covers, upholstery, padding and carpet floor. Carpet uses the exclusive foam system and high-efficiency vacuum system. In this way, the solution of water and detergent sprayed into the fibers of the fabric is immediately removed by the vacuum action, eliminating the dirt and allowing quick drying. Thanks to Carpet, the fabric surfaces will be like new once more, clean and sanitized. The compact dimensions and ease of transport make Carpet cleaners perfect for use in the transport sector, on board trains or buses, in car washes, but also on large surfaces, like carpet floors in airports, hotels, cinemas, theaters and conference rooms.

CM Mini Orbital

CM43 F Orbital

CM1500

CM Mini Orbital

Working width: **250 mm**

Power supply: **cable/battery**

Drive: **direct orbital**

The CM Mini Orbital single disc machines are the most compact models in the Comac range, capable of fully exploiting orbital technology, perfect for small and hard-to-reach spaces. Available with three different types of bases: rectangular CM Mini Orbital, round CM Mini Orbital R, or with the shape of precision orbital tools, CM Mini Orbital TR, these machines represent the professional solution for cleaning, scrubbing, polishing, and finishing of edges, corners, steps, skirting boards, and all small spaces. The oscillating head of the CM Mini Orbital range adapts to all surfaces and works effectively even on uneven floors, minimizing user effort. Furthermore, these "mini" single disc machines offer excellent stability, maneuverability, and a robust, compact frame, yet are easy to transport, allowing you to use them anywhere. All models are available in both corded and battery-powered versions for use even in places where it is not possible to connect to the electrical network. Compact orbital single disc machines: surface applications The CM Mini Orbital range is the ideal solution for cleaning, heavy duty maintenance and floor finishing on marble, stoneware, cement, terracotta, resin, parquet and wood floors. Extremely versatile, this ultra-compact orbital single disc machines are the preferred choice of cleaning contractors, and they are perfect for working in healthcare, public, HoReCa and large-scale retail sectors.

CM43 F Orbital

Working width: **430 mm**

Power supply: **cable**

Drive: **direct orbital**

The CM43 F Orbital single disc machine exploits the principle of the roto-orbital system to achieve excellent stability and great ease of use and maneuverability, making it suitable for even the least experienced operators and making physical strength no longer a requisite. The roto-orbital movement also enhances the cleaning results of a regular single disc machine, making CM43 F Orbital particularly recommended for heavy duty cleaning. CM43 F Orbital offers all the advantages of roto-orbital movement such as reduced electrical, water and detergent consumption, as well as achieving superior results in less time compared to a regular single disc machine. CM43 F Orbital ensures exceptional results on any type of floor and is particularly recommended for frequent applications like heavy duty cleaning or scrubbing, de-waxing and crystallization. The CM43 F Orbital Spray version is also perfect for cleaning carpeted floor and rugs thanks to the spray kit for distributing water or detergent solution. Extremely versatile, it's the ideal solution for use in healthcare, public and HoReCa sectors, as well as for cleaning contractors and service companies operating in the retail spaces.

CM1500

Working width: **500 mm**

Power supply: **cable**

Drive: **direct**

CM1500 V is the high speed single disc machine from Comac that's suitable for restoration and dry polishing work. Extremely easy to handle, it is supplied with a vacuum mechanism for collecting dust in the dedicated container compartment. Equipped with an exceptional balancing system and gas spring on the handle, the CM1500 V is extremely pleasant to use, with no user-fatigue. The CM1500 V high speed professional single disc machine from Comac is the ideal solution for service and cleaning contractors operating in hotels, convention centers and for use in the HoReCa, Health, Public, Automotive, Retail and Large-Scale Retailing sectors.

CI C10

CI C15

CI C10

Max pressure: **150 bar**

Max flow rate: **450 l/h**

Power consumption: **2,1 KW**

The CI C10 is a cold pressure washer with compact dimensions but that is high performing. Designed to be practical and easy to use, it is also easy to handle and transport. The induction motor that the CI C10 is equipped with makes it a professional high-pressure washer that is powerful, reliable, but also quiet and therefore suited to frequent use. The CI C10 is the ideal pressure washer for cleaning walls, floors, stairs, and outdoor areas in the HoReCa, Wellness, Sports, Retail and Public sectors. It is also a cold high pressure washer perfect for cleaning contractors and, in general, for removing resistant dirt from medium-sized surfaces measuring 40-60 m2.

CI C15

Max pressure: **180 bar**

Max flow rate: **600 l/h**

Power consumption: **3,1 KW**

The CI C15 professional cold high pressure washer has been designed for the most demanding users who want to combine power and high performance on an extremely compact machine. CI C15 is a high-pressure cleaner that is easy to use and move thanks to the ergonomic handle and its rubber wheels. Developed in a vertical position to be practical and maneuverable, the CI C15 can also be stored horizontally to make it even more handy. This high-performing and powerful pressure washer is perfect for professional cleaning, even frequent, in the automotive, industrial, logistics and handicraft sectors. But it is also the perfect cold high-pressure washer for cleaning professionals looking for performance and convenience in a single machine.

E-SPRAY

SANEX

E-SPRAY

Solution tank capacity: **1 l**

Spraying system: **pump**

Battery run time up to: **8 h**

E-Spray is a professional gun sprayer designed to distribute disinfectant solutions effectively and uniformly on surfaces. Comac E-Spray Electrostatic is a sanitizing spray gun that exploits the principle of electrostatic induction to distribute disinfectant solutions on surfaces effectively and evenly; it's an electrostatic spray gun. The electrostatic charge means that the droplets are attracted to the surface they're directed towards and generate a genuine hygienizing coating when they settle on it. Comac E Spray is lightweight and genuinely comfortable because it's powered by a lithium battery that allows several hours of hygienization, freely and anywhere, without worrying about the cable. The solution is sprayed in tiny, light droplets that can get to every point of the area concerned and settle effectively. For effective disinfection, always follow the instructions for using the disinfectant solution provided by the manufacturer.

SANEX

Solution tank capacity: **4,5 l**

Spraying system: **compressor**

Battery run time up to: **2 h**

Sanex is a small compressor sanitizer that's perfect for spraying sanitizing products in small and medium-sized environments. Lightweight and easy to transport, Sanex is the ideal solution for sanitizing and deodorizing rooms and offices in any sector. The battery-powered versions also allows even more freedom of movement in places without a power socket. This equipment adapts to various requirements, allowing the use of sanitizing, disinfectant or deodorizing solutions and use inside cars and air conditioning circuits. All this makes Sanex extremely versatile. It can also be used in larger environments like entrance areas and convention rooms or offices, bars, restaurants, shops, schools, gyms and any other place where effective sanitization is needed. For effective disinfection, always follow the instructions for using the disinfectant solution provided by the manufacturer.
