

carpet

Carpet: the ideal foam carpet cleaner for the professional washing of upholstery and carpet floor

Carpet by Comac is the ideal equipment for deep cleaning and removing stains and dirt on fabric covers, upholstery, padding and carpet floor.

Carpet uses the exclusive foam system and high-efficiency vacuum system. In this way, the solution of water and detergent sprayed into the fibers of the fabric is immediately removed by the vacuum action, eliminating the dirt and allowing quick drying. Thanks to Carpet, the fabric surfaces will be like new once more, clean and sanitized.

The compact dimensions and ease of transport make Carpet cleaners perfect for use in the transport sector, on board trains or buses, in car washes, but also on large surfaces, like carpet floors in airports, hotels, cinemas, theaters and conference rooms.

CARPET
Tank capacity: 20 l
Type: Crpet
Suction: 1 motor

Key factors of Carpet

- Excellent combination of drying and scrubbing pressure with very limited dimensions.
- The convenient brush provided delivers the foam and allows it to be worked even on vertical surfaces before going on to vacuum.
- Equipped as standard with a 3 m injection/extraction tube and an ergonomic hand nozzle
- The handy bristle brush for the distribution of the foam is essential to the cleaning of upholstery (optional).
- Wand for cleaning carpet floor or rugs also available as optional accessory.
- The 20-l capacity of the detergent solution tank ensures a very long autonomy, given the reduced consumption required by the foam system.
- To make the user work easier, the tank can be removed to be emptied.
- Recovery tank equipped with the efficient AIR STOP filter which cuts down even the smallest residual foam flakes, preserving the integrity of the suction motor.
- Equipped with a practical handle for transportation and winding the hoses.
- Bus kit (with 10 m flex hose and tube) and long handle kit available as optional equipment.

The dense and stiff foam is applied through a carpet brush or scrubber so that also mechanical action is ensured and the cleaning power of the detergent can be enhanced.

With suction the product is thoroughly removed so that the fabric is left perfectly dry.
