PM - Pressure Monitoring

The Comac system for monitoring the pressure on the brushes

Pressure Monitoring is the system for **constant monitoring** of the power dispensed by the motors on the brushes, and guarantees **maximum effectiveness** on any type of flooring, even when this is uneven.

This translates into a floor scrubber that is **even easier to use**, as it can adapt to the conditions of the floor and dirt, adjusting the weight exerted, **protecting the motors** and thus preventing the possibility of misuse.

**CONSTANT MONITORING OF THE POWER
DISPENSED BY THE MOTORS ON THE BRUSHES.**

BENEFITS

- Constant monitoring of the power dispensed by the motors on the brushes
- Improved cleaning performance and maximum efficacy on all floors, including those that are uneven
- Simplified use of the floor scrubber
- Protects the motors, preventing the possibility of misuse
