IPM - Intelligent Pressure Monitoring

The solution for constant and intelligent monitoring of the pressure on the brushes

IPM – Intelligent Pressure Monitoring is not a simple pressure sensor, but rather a **weight sensor** which can provide the operator with a constant and **accurate measurement of the pressure exerted on the brushes** of the floor scrubber. IPM provides further support to the operator when facing situations that require heavy duty cleaning.

THE PRESSURE INDICATION IS EXTREMELY RELIABLE AS IT DISPLAYS THE ACTUAL KG EXERTED ON THE BRUSH HEAD.

BENEFITS

- Constant and accurate measurement of the pressure exerted on the brushes of the floor scrubber
- Improved cleaning performance and maximum efficacy, even in situations requiring heavy duty cleaning
- Simplified use of the floor scrubber
- Precise, real-time indication of the pressure on the brushes (in kg)
